Summary

Driven Frontend Developer and former e-commerce entrepreneur, expertly melding UI/UX design with web development. Armed with an MBA in Fashion Technology and Scrimba certification, I specialise in transforming user-centric designs into immersive web experiences. My journey combines a creative vision with technical skill, enabling me to deliver elegant and efficient web solutions that resonate with users.

Skills

Web Development: HTML • CSS • Javascript • React • GitHub • Figma • Balsamiq • 3D Design • Webflow • ReadyMag • Shopify

Experience

Yoona.ai	Remote
UI Developer	04/2021 - 12/2022

- Spearheaded the design process, creating low-fidelity sketches and wireframes with Balsamiq, based on user research, to guide development of user-friendly interfaces.
- Developed high-fidelity interactive prototypes using Figma, translating design concepts into practical web elements.
- Conducted comprehensive user-centered research, utilising both qualitative and quantitative methods, to inform design decisions and enhance user experience.
- Collaborated globally, using tools like Miro and GitHub, ensuring alignment with product roadmaps and strategic goals.
- Orchestrated the creation and maintenance of two Webflow-based websites, overseeing both their design and technical development

Arkins	New York City, USA
Co-Founder & Creative Director	02/2014 - 01/2020

- Designed, developed and managed the company's e-commerce website using Shopify, demonstrating practical web development skills and a user-centric approach.
- Applied knowledge of UI/UX principles to optimise the website's layout, design, and functionality.
- Conceptualised and created comprehensive marketing materials and packaging designs, showcasing a strong sense of branding and visual communication.

Projects

Personal Dashboard Extension

A Chrome Extension that provides an overview of the current time, weather conditions, and Bitcoin performance. It interacts with multiple APIs using asynchronous JavaScript to deliver real-time data.

- Tools Used: HTML, CSS, JavaScript, External APIs, Google Fonts
- Repo: https://github.com/GermaineDeNigris/personal-dashboard
- Live: https://germaines-personal-dashboard.netlify.app/

Grocery List Mobile Application

An interactive grocery list application that allows users to add items to their shopping list, mark items as obtained, and manage their grocery needs efficiently.

- Tools Used: HTML, CSS, JavaScript, Google Fonts, Firebase
- Repo: https://github.com/GermaineDeNigris/Grocery-List
- Live: https://germaines-grocery-list.netlify.app/
